### Function of Rack ID

- The same alphanumeric information is laser engraved on the bottom of the rack as a 2D code and on the side as a 1D barcode.
- Code specifications [2D code on the bottom (DataMatrix ECC200) + 1D barcode on the side (Code 128) (2-digit alphanumeric characters, 8-digit numbers)]
- By attaching 2D code for Rack ID onto the bottom of Rack, Tube ID and Rack ID can be read at the same time, reducing stress on the sample during reading process. (\*However, only when using a reader that can read all at once)
